Everblades Replacement Instructions

WARNINGS!

- Bending or twisting any portion of the wiper blades may cause damage and poor wiping.
- Keep wires from sharp edges in all steps

INSTRUCTIONS:

1. Stop your wipers in a **vertical position**.
2. Remove the zip ties from the wiper arm **above the barrel connectors**.
3. Disconnect the inline barrel connectors.
 - a. *No worries on remembering which ones went to what, they can be re-attached vice versa.*
4. Remove the entire wiper assembly from the wiper arm.
5. Attach new replacement assembly to the wiper arm.
6. Re-attach the barrel connectors.
7. Use the **black ties** (supplied with refills) to secure the wires to the wiper arm.
 - a. **CAUTION: Do NOT restrict the wire or the blade action by pulling the wire taught.**

FINAL TEST:

Turn wiper heater switch **ON** to make sure wiper blades heat.

- A. If they **DON'T** heat — recheck your connections at all points.
- B. If no heat in a few minutes, **check fuses** and **connections**.
- C. Make sure both **grounds** are **GOOD**.
- D. If they **DO** heat — you have been successful!
- E. Sing or hum “I Can See Clearly Now” by Johnny Nash!
